

NeedleNet- Hire a Tailor App

Developed By: Srinithi T

PROJECT:

The NeedleNet project is a comprehensive platform designed to streamline the tailoring and delivery process by connecting customers, tailors, and delivery partners. It is a multi-user system where each role has distinct functions and permissions.

The core workflow begins with a **customer** who can search for tailors based on location and specialization, place an order, and track its progress. Once an order is placed, a **tailor** can view the order, set a price, confirm or decline it, and create portfolio posts to attract more business. When an order is completed, the tailor updates its status for delivery.

A **delivery partner** then gets assigned the job based on their service area, updates the delivery status, and completes the delivery.

PRODUCT DURATION:

26th April 2025 To ()
September 2025

PROJECT OVERVIEW

PROBLEM

Customers: Difficulty in finding reliable, skilled tailors; lack of transparent pricing; inconvenient measurement processes; limited design inspiration; and uncertainty about order status.

Tailors: Limited reach beyond local clientele; challenges in showcasing their work; inefficient order management; and difficulties in attracting new customers.

SOLUTION

Customers: NeedleNet offers easy discovery of skilled tailors near you, provides a platform for clear custom order requests, and ensures real-time updates on your garment's progress, giving you full transparency and peace of mind.

Tailors: NeedleNet acts as a powerful digital marketplace, significantly boosting tailor visibility and allowing them to showcase their craftsmanship to a much broader customer base, helping them attract new business efficiently.

Linkedin Article:

NeedleNet- Hire a Tailor App

Summary:

NeedleNet is an innovative digital marketplace designed to seamlessly connect customers with skilled tailors across India for personalized custom clothing, alterations, and repairs. The project's core aim is to modernize the traditional tailoring experience by providing a transparent, convenient, and efficient platform. It empowers customers to easily discover trusted artisans and track their orders, while enabling tailors to expand their reach, showcase their craftsmanship, and streamline their business operations digitally. NeedleNet ultimately fosters a more accessible and efficient ecosystem for personalized fashion.

PROBLEM STATEMENT

The current tailoring industry often faces several challenges, including a lack of a centralized platform for customers to find and connect with tailors, inefficient ordering and tracking processes, and fragmented payment systems. Customers often struggle to find tailors with specific specializations or reviews, leading to a trial-and-error approach. Tailors, in turn, may have difficulty reaching a broader customer base and managing their order flow efficiently. Delivery logistics can also be a significant pain point, as they are often handled manually, leading to delays and communication issues.

PROJECT OVERVIEW

MY ROLE

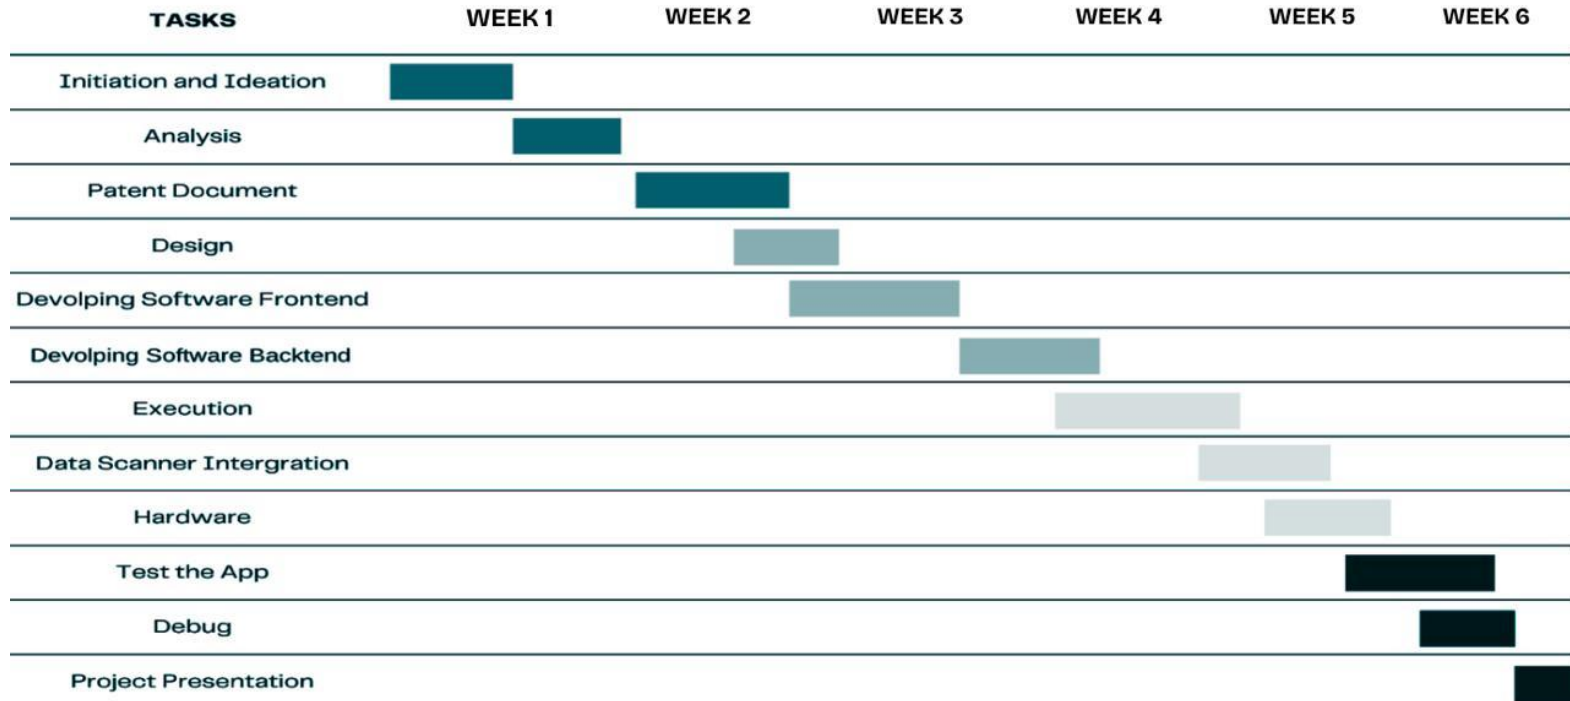

- Designed and implemented the entire UI/UX, ensuring a seamless and intuitive experience while testing and optimizing performance.
- Developed NeedleNet end-to-end, building the complete tailoring marketplace application from conception to deployment. Architected and managed the backend infrastructure and database integration, ensuring robust handling of all user and order data.

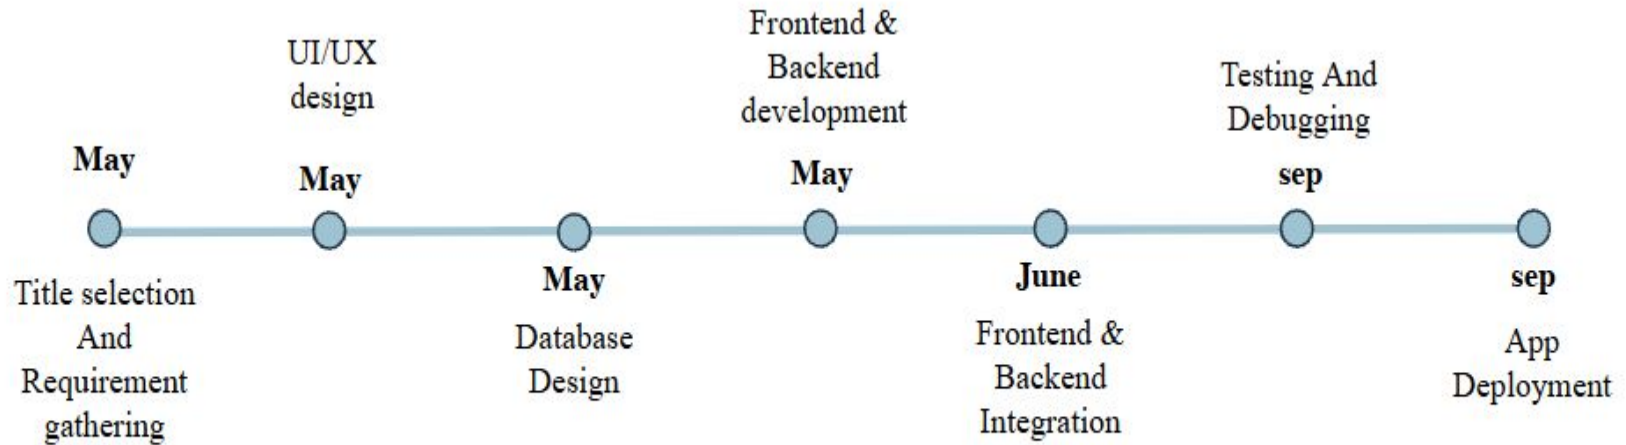

MY RESPONSIBILITIES

- I am responsible for Design, code, and maintain the app. Ensure the app's functionality and security
- I will also Test, debug, and optimize the app. Collaborate with the team to meet project goals

PROJECT TASK ALLOCATION

PROJECT TIMELINE

USER PERSONA: TAILOR

Name: Jeni

Age: 42

Experience: 4 years

Problem statement:

Jeni is a 48-year-old experienced tailor who runs a small, well-established small shop beside her house. She is highly skilled but relies mostly on local walk-ins and word-of-mouth for business. She's proud of her craftsmanship but struggles with expanding his clientele.

Pain Points:

- ❖ "My shop depends mostly on regulars; finding new customers is a slow process."
- ❖ "Managing all my orders, measurements, and customer updates manually is becoming chaotic."
- ❖ "It's hard to show new clients the variety and quality of work I've done."

USER PERSONA: TAILOR

Name: Jeni

Age: 42

Experience: 4 years

Goals:

- ❖ Increase his customer base beyond his local area.
- ❖ Efficiently manage multiple orders and customer communications.
- ❖ Showcase his best work to attract new clients.
- ❖ Streamline his daily operations.

How NeedleNet Helps Jeni:

NeedleNet provides Jeni with a digital storefront to showcase his portfolio to a wider audience, streamlines order booking and management, centralizes customer communication, and helps her attract new business, allowing her to focus more on his craft.

USER PERSONA: Customer

Name: Angelina

Age: 24

Role: Customer

Problem statement:

Angelina is a 24-year-old marketing professional living in Chennai, India. She enjoys keeping up with fashion trends but often finds ready-to-wear clothing doesn't fit perfectly or isn't unique enough. She also needs alterations for new purchases and repairs for her favorite garments.

Pain Points:

- ❖ "I hate going to multiple shops just to compare prices and quality."
- ❖ "It's so hard to find a good tailor who understands my style and delivers on time."
- ❖ "Communicating my design ideas clearly to a tailor is often a challenge."
- ❖ "I never know if my garment will be ready when promised."

USER PERSONA: CUSTOMER

Name: Angelina

Age: 22

Goals:

- ❖ Find a reliable and skilled tailor for custom designs and alterations.
- ❖ Get perfectly fitted clothes without multiple physical visits.
- ❖ Have transparency on pricing and project timelines.
- ❖ Discover unique tailoring styles and artisans

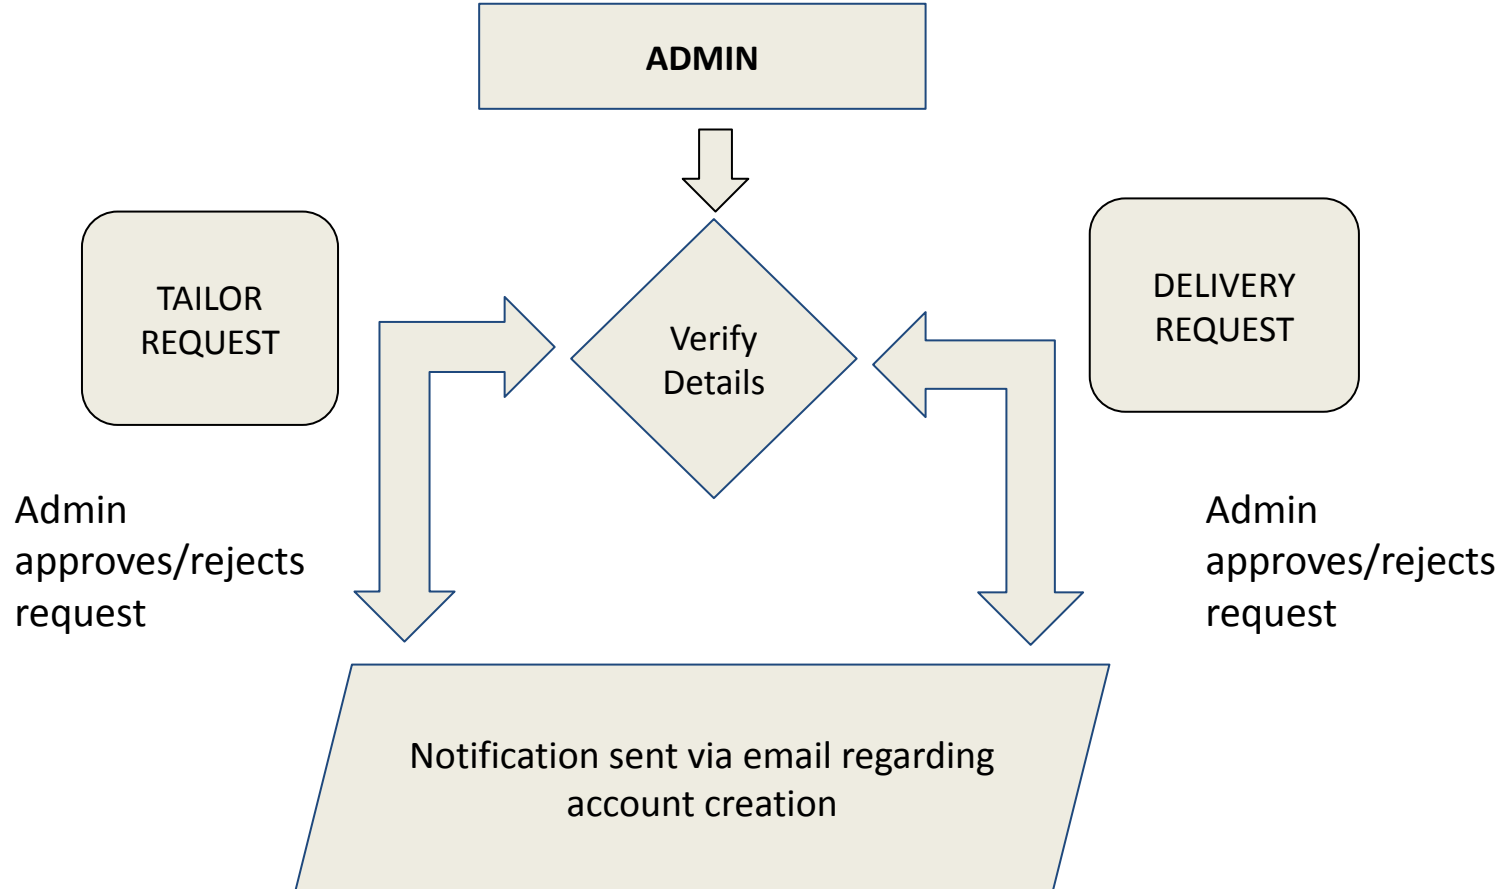

How NeedleNet Helps Angelina:

NeedleNet offers a curated list of verified tailors, allows her to submit detailed custom requests with images, provides clear pricing, and enables real-time tracking of her orders, ensuring convenience and peace of mind.

COMPETITIVE ANALYSIS

Feature / Comparison Point	NeedleNet	Traditional/Local Tailors	Other Online Platforms (Niche/General)
Tailor Discovery	Easy search, filtered results, diverse profiles	Limited to local knowledge/word-of-mouth	Often niche-specific, less comprehensive
Transparency (Pricing/Status)	High (clear quotes, real-time tracking)	Low (often verbal, opaque)	Varies, sometimes limited
Communication	Streamlined in-app chat	Manual (calls, visits)	Varies, sometimes external
Order Management (for Tailors)	Efficient digital tools	Manual, paper-based, time-consuming	Limited or generic tools
Showcasing Portfolio	Dedicated digital storefront, image uploads	Physical samples only, limited exposure	Varies, usually image-based
Customer Reach (for Tailors)	Expanded, national potential	Primarily local	Segmented, often urban-focused
Customer Convenience	High (app-based, end-to-end)	Low (multiple physical visits)	Varies, often online but not end-to-end

BUSINESS POTENTIAL

Untapped Market & Clear Value

NeedleNet targets India's vast, unorganized tailoring market, offering convenience and transparency to customers. It empowers tailors with expanded reach and efficient digital operations, directly addressing key industry gaps.

The Existing Market Gap

The traditional tailoring market is fragmented and inefficient. Customers struggle to find reliable tailors and lack transparency, while tailors face limited reach and inefficient management, hindering growth for both.

NeedleNet: Bridging the Divide

NeedleNet directly addresses these gaps via a centralized digital marketplace. It offers customers intuitive tailor discovery and transparent order tracking, concurrently empowering tailors with expanded reach and streamlined operations, creating a connected tailoring ecosystem.

IMPACTS

Transforming the Tailoring Experience:

NeedleNet profoundly impacts tailoring by digitizing and streamlining processes. It moves an unorganized industry towards a more structured, transparent, and efficient model.

Benefits for Customers:

Customers gain unprecedented convenience and transparency in finding skilled tailors. This results in personalized, high-quality, and stress-free custom clothing services.

Empowerment for Tailors:

Tailors significantly boost their business through expanded market reach and efficient digital tools. The platform elevates their professional visibility, fostering sustained growth and recognition.

TAKEAWAYS

Revolutionizing a Traditional Industry:

NeedleNet successfully modernizes tailoring, demonstrating how digital marketplaces address real-world inefficiencies in unorganized sectors.

Empowering Both Ends of the Market:

The project's success stems from its dual impact: offering convenience and transparency to customers, while empowering tailors with expanded reach and efficient tools.

A Model for Future Digitalization:

NeedleNet stands as a prototype for digital transformation, highlighting the importance of user-centric design and robust architecture for sustainable growth.

NEXT STEPS

01

Feature Enhancement & User Experience:

Our immediate focus is integrating secure payment gateways and a tailor rating/review system to enhance user trust and experience.

02

Market Expansion & Growth:

The next phase involves geographic expansion across India and diversifying into specialized tailoring categories, including potential logistics partnerships.

03

Continuous Improvement & Scalability:

We will prioritize continuous performance optimization and scalability. Future efforts include implementing advanced analytics for strategic insights and long-term success.

CONCLUSION

- ❖ **Tailoring Modernized:** Successfully digitized a traditional, unorganized industry.
 - ❖ **Dual Empowerment:** Benefited both customers (convenience, transparency) and tailors (reach, efficiency).
 - ❖ **Proven Solution:** Developed a robust, user-centric platform addressing key market gaps.
- Future Growth:** Poised for significant expansion and continuous innovation in personalized fashion.
